VelocityEHS ®

Why Chemical Management Software?

True Sustainability Starts with Chemical Management

Take control of your chemical footprint

Streamline regulatory reporting

Elevate your chemical management with machine learning-based capabilities that empower you to control & report on chemicals at the ingredient level.

VelocityEHS gives you a complete picture of your chemical footprint — the chemicals you have on-site, storage locations and quantities of each. And new ingredient indexing automations make it easier than ever to assess and replace products based on their ingredient's potential to cause harm to people and the environment.

It's a comprehensive solution for indexing, tracking, labeling, and reporting on your chemicals. With Velocity, you're not just complying with hazcom regulations; you're reducing your company's risk profile and aligning business objectives with sustainable best practices.
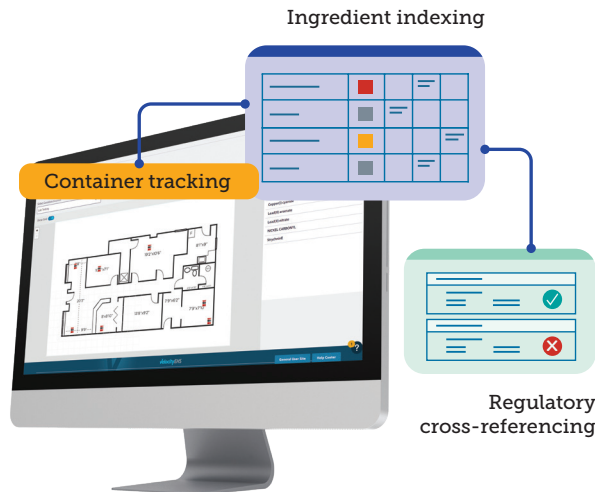

"Flexible, convenient, easy to use and explain to the employees. Great time saver over the old paper system that we had. I am very happy with the experience; from building the file to the roll out to the employees."

Mike Fergurson
Corporate Trainer, Cope Plastics

See What VelocityEHS Can Do for You

Core Capabilities:

+ SDS management
+ Chemical inventory management
+ GHS secondary labeling
+ Regulatory reporting
+ Right-to-know compliance
+ Mobile access
+ Ingredient indexing
+ Ingredient level of concern

Ingredient indexing

Container tracking

Regulatory cross-referencing

Simplify hazcom compliance.
Ensure alignment with laws covering employee right-to-know access, container labeling, and chemical handling.

Improve chemical management.
Achieve greater container/ingredient-level control over the location, status, and risks of your chemical inventory.

Streamline reporting and regulatory cross-referencing.
Crosscheck products against critical international hazardous substance lists and simplify regulatory reporting.
